

Senior Web Application Developer

October, 2011

FLYHT seeks experienced and motivated software developers to fill multiple positions as web solution architects on our UpTime™ ground system team. These positions are located in our Calgary, Alberta office.

Company

FLYHT designs and develops products and services for the international aerospace industry. The company's patented technologies enhance safety, efficiency and profitability by providing real-time data communications to airline customers worldwide. FLYHT is based in Calgary, Canada and has service locations in the United States, China, Ireland, England, Switzerland, Dubai, India, and Argentina.

Position Summary

You will be part of a team of software engineers working on the support and maintenance of existing products, as well as development of new applications and solutions. You and your team will be responsible for developing and maintaining stable, robust, and scalable interactive web-based applications. You will take part in multiple aspects of the software development lifecycle, including requirements gathering and analysis, design, implementation, and testing.

Senior individuals may contribute to architectural design recommendations for future application development, and may participate in the oversight and mentoring of more junior team members.

Required Qualifications

Minimum 5 years J2EE experience including:

- Strong experience in object oriented design and modeling.
- Strong SQL and RDBMS development skills.
- Proven track record of working in a collaborative team environment.
- Proficiency with both client and server-side programming, including HTML, Javascript, CSS, J2EE, servlets, JSPs, and JDBC.
- Familiarity with Torque or equivalent ORM framework.
- Experience with a Java MVC framework, such as Struts / JSF / Spring MVC.
- Experience working with Apache, Websphere servers or equivalent.

Education

- A degree in Computer Engineering or Computer Science with a web applications focus; technology diploma with relevant industry experience.

Additional Qualifications

- Experience with AIX / UNIX.
- Experience in developing web services: WCF, SOAP, ASP.NET.
- Experience in development of clean UI design.
- Experience in developing with C#, Silverlight, ISS.
- Experience with SVN, IBM Rational Application Developer, Eclipse IDE.
- Knowledge and experience with various testing methodologies and practices.
- Experience in developing aviation-industry software according to DO-178B Certification Standards
