Forward Looking Statements

This discussion includes certain statements that may be deemed “forward-looking statements” that are subject to risks and uncertainty. All statements, other than statements of historical facts included in this discussion, including, without limitation, those regarding the Company’s financial position, business strategy, projected costs, future plans, projected revenues, objectives of management for future operations, the Company’s ability to meet any repayment obligations, the use of non-GAAP financial measures, trends in the airline industry, the global financial outlook, expanding markets, research and development of next generation products and any government assistance in financing such developments, foreign exchange rate outlooks, new revenue streams and sales projections, cost increases as related to marketing, research and development (including AFIRS 228), administration expenses, and litigation matters, may be or include forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on a number of reasonable assumptions regarding the Canadian, U.S., and global economic environments, local and foreign government policies/regulations and actions and assumptions made based upon discussions to date with the Company’s customers and advisers, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in the forward-looking statements include production rates, timing for product deliveries and installations, Canadian, U.S., and foreign government activities, volatility of the aviation market for the Company’s products and services, factors that result in significant and prolonged disruption of air travel worldwide, U.S. military activity, market prices, foreign exchange rates, continued availability of capital and financing and general economic, market, or business conditions in the aviation industry, worldwide political stability or any effect those may have on our customer base. Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements.

Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, there can be no assurance that such expectations will prove to have been correct. The Company cannot assure investors that actual results will be consistent with any forward-looking statements; accordingly, readers should not place undue reliance on forward-looking statements. The forward-looking statements contained herein are current only as of the date of this document. The Company disclaims any intentions or obligation to update or revise any forward-looking statements or comments as a result of any new information, future event or otherwise, unless such disclosure is required by law.

FLYHT: Leading Provider of Real-Time Aircraft Data Streaming Technology

The Automated Flight Information Reporting System (AFIRS™)

- Iridium-based SATCOM device installed on the aircraft
- AFIRS connects to numerous aircraft systems
- AFIRS software acquires and transmits aircraft data in real time
- Data is processed and distributed to the customer using FLYHT’s ground server network called UpTime™

HOW WE DO IT

Data-based services include:

- Enhanced global flight tracking
- Event triggered flight data recorder (FDR) streaming
- Two-way text messages (iPad, MCDU)
- Real-time proactive aircraft health monitoring solutions
- Fuel management
- Real-time weather observations
Leadership Team:

Industry Drivers:

Global

UN: ICAO’s Annex 6: Operation of Aircraft
Amendment 39 - November 2018
• Normal Aircraft Tracking: 15 minute intervals
Amendment 40 - January 2021
• Autonomous Distress Tracking: 1 minute intervals
• Timely Access to Flight Recorder Data: recovered & available

China

CAAC legislated SATCOM regulations
CCAR 121 R5 - December 2019
• Airline Operations Center: aircraft within 4 minutes

Destination China!
• 25% of aircraft on order
• FLY has captured 23 of 57 carriers
• 74 new civil airports being built by 2020. 216 new airports by 2035!

</table>
| • Customer was able to take the aircraft out of service to diagnose and fix the issue | Replacement cost for the engine: $5.2 million  
Repair cost based on AFIRS-driven data: $780k  
Net Savings > $4 million |
| **Logistical support issues** | |
| Geo-fencing solution built into software  |
| • Alerts sent to customer showing aircraft entering/exiting specific boundaries  
• Keeps all parties advised, in real-time, on the progress of each flight | Reduced costs for the airline associated with poor communication and logistical support issues |
| **Lease agreement required 10% of takeoffs at reduced thrust** | |
| Monitor aircraft operations  |
| • Customer was able to monitor the parameters of operations and create real-time reports | Hundreds of thousands of dollars in lease penalties |
Milestones since last AGM

Mar 2018
- 2 Million Uptime Flights

Apr 2018
- 3 Million Uptime Flight Hours

May 2018
- Canadian patent for FLYHTStream™
- FLYHT’s selection as Inmarsat’s inaugural Aviation Certified Application Provider (CAP) for Imarsat’s new SwiftBroadband-Safety services

Aug 2018
- Boeing, Embraer and FLYHT’s joint release of a whitepaper, describing the results of the positive ecoDemonstrator trials

Sep 2018
- Integration with Spectralux FANS datalink

Oct 2018
- Acquired Panasonic Weather Solutions’ Assets
- Jambojet Selects FLYHT for Long Range Communications

Dec 2018
- FLYHT announces Contract for Additional 100 AirAsia Aircraft

Jan 2019
- FLYHT signs US$740K deal expansion with Azur Aviation

Feb 2019
- Hires Liolios now Pathways as US Based IR Advisor

March 2019
- KRC Insights publishes Financial Research Report on FLY

April 2019
- FLYHT receives US$1.8 Million OEM Purchase Order
FLYHT’s Weather and Satellite Data Team

October 2018 - Acquired Panasonic Weather Solutions

**Experienced Personnel**

- Operational sensor network since 2004
- 27 atmospheric scientists, meteorologists, and engineers

**Technology and Intellectual Property**

- Patented TAMDAR sensor installed on commercial aircraft for high-resolution weather observation collection
- Advanced quality assurance for data transmitted from aircraft
- Global real-time communications and data management infrastructure
- TAMDAR = Tropospheric Airborne Meteorological Data Reporting

**Asset Acquisition Details**

- $20M backlog
- 12 new airline customers including Air Asia with 190ac
- Synoptic/NOAA contract for TAMDAR Weather observations
- US $3.3- $4.3M asset acquisition PAC contribution
Creating a Better Weather Forecast

TAMDAR Equipped Commercial Aircraft

Iridium Global Satellite Communication System

Data Quality Assurance, Filtering, and Processing

Government / Partner Data Assimilation & Weather Modeling
TAMDAR: State-of-the-Art Weather Data Acquisition

Weather Balloons

- 70-year old technology
- 800 locations around the globe
- 2x daily soundings (12 hours apart)
- High-latency in reporting (2-4 hours)
- Inaccurate position data

TAMDAR

- Patented TAMDAR atmospheric sensor
- 200+ aircraft in North America, Asia, and Europe
- Frequent soundings & continuous observations
- Real-time reporting (no latency)
- GPS-based date/time/position data
- Thousands of soundings per day
FLYHT’s proprietary Tropospheric Airborne Meteorological Data Reporting (TAMDAR) weather sensor accurately captures:

✓ Wind: speed and direction
✓ Temperature
✓ Relative humidity
✓ Icing
✓ Eddy Dissipation Rate (EDR)
✓ Turbulence
✓ Position: lat/lon, altitude, time
The TAMDAR Difference

Forecast with TAMDAR

72 hour forecast with / without TAMDAR Data versus actual weather

USD $2 Million / year contract with NOAA

Forecast without TAMDAR

Radar of Actual Event
Boeing ecoDemonstrator Program

✓ Five trials over seven years
✓ 2018 Program:
  • Fedex B777 Freighter
  • 37 different technologies tested

Boeing initiative focused on accelerating the testing, refinement, and completion of new technologies.

2018 ecoDemonstrator Flight Data Streaming Trials: a collaboration between Boeing, Embraer, and FLYHT
Boeing ecoDemonstrator - Joint Conclusion (Boeing, Embraer, FLYHT)

Whitepaper jointly presented at AEEC conference (Aug 2018)

“Existing, commercially available equipment and network services (FLYHT’s AFIRS and Inmarsat SwiftBroadband) are suitable for providing distress flight data streaming capabilities that support ICAO objectives”

Core Findings

- Current equipment supports ICAO 10054 FDR and CVR streaming requirements
- Inmarsat SwiftBroadband capabilities exceed bandwidth requirements to stream real-time and historical FDR and CVR data
- Limited bandwidth options such as the Iridium SBD services used in these tests can provide a useful flight data streaming capability
Recreating the Pilot’s Experience: Virtual Cockpit
